

Alexandros Rekkas — Curriculum Vitae

Education

PhD in Medical Informatics, Erasmus Medical Center, The Netherlands (2017–2023)

Dissertation: *Beyond the average treatment effect: Risk-based approaches to medical decision making*. Supervisors: Prof. P. R. Rijnbeek, Prof. E. W. Steyerberg, Assoc. Prof. D. van Klaveren.

M.Sc. Statistics (cum laude), KU Leuven, Belgium (2015–2017)

Dissertation: *Robust model selection for generalized linear models*. Supervisor: Prof. S. Van Aelst.

B.Sc. Mathematics, Aristotle University of Thessaloniki, Greece (2009–2015).

Research Projects

SYNTHIA (IHI Innovative Health Initiative, 2025) — Synthetic data generation framework for integrated validation of use cases and AI healthcare applications.

Smart Health EDIH (Digital Europe Programme & ESPA 2021–2027, 2024) — European Digital Innovation Hub for Smart Health.

EHDEN (Innovative Medicines Initiative 2 Joint Undertaking, 2019–2023) — European Health Data and Evidence Network. Doctoral research on personalized medicine using real-world data.

ADVANCE (IHI Innovative Health Initiative, 2016) — Accelerated Development of Vaccine Benefit-risk Collaboration in Europe.

Teaching

University of Western Macedonia (Winter 2025–2026): Courses in Educational Research, Statistics in Educational Research, and Quantitative Methods.

NIHES (2018–2019): Advanced Analysis of Prognosis Studies, Erasmus MC.

OHDSI Symposium Tutorial (2019): Population-Level Estimation, North Bethesda, USA.

Student Supervision (2023): Gidius van de Kamp, M.Sc. internship on plasmode simulations for the OMOP common data model.

Conference Presentations (selected)

1. Risk Stratified Analysis of Treatment Effect in EHRs. European OHDSI Symposium, Rotterdam, 2018.
2. Exploring Heterogeneity of Treatment Effects: New OHDSI Analytics Package. OHDSI Symposium, North Bethesda, 2018.
3. R Package to Explore Heterogeneity of Treatment Effects. European OHDSI Symposium, Rotterdam, 2019.

4. Assessing Heterogeneity of Hypertension Treatment Effects. OHDSI Symposium, North Bethesda, 2019.
5. Large-scale evaluation of treatment effect heterogeneity in hypertension. OHDSI Global Symposium, 2020. *Best Contribution in Open-Source Analytics Development*.
6. Treatment heterogeneity: teriparatide vs bisphosphonates. OHDSI Global Symposium, 2021.
7. Trends in patient-level prediction models using EHR data. OHDSI Global Symposium, 2021.
8. RiskStratifiedEstimation R package. European OHDSI Symposium, Rotterdam, 2022.
9. Predicting individualized treatment effects using baseline risk. ISCB 43rd Annual Conference, Newcastle, 2022.
10. Treatment heterogeneity: Teriparatide vs Bisphosphonates. ICPE 38th Conference, Copenhagen, 2022.
11. Risk-based assessment of treatment effect heterogeneity. SMDM 18th European Conference, Berlin, 2023.
12. Treatment effect heterogeneity in LEGEND-Hypertension. European OHDSI Symposium, Rotterdam, 2023.
13. PlasmodeSim: R package for plasmode simulations. European OHDSI Symposium, Rotterdam, 2023.

Skills

Programming: R (advanced), Python (intermediate).

Languages: English (C2), German (B2), Greek (native).
